## Scope of the case

- 6. The complainant contacted the Commissioner on a number of occasions in 2021 to complain about the way his request for information had been handled.
- 7. The scope of the Commissioner's investigation will be to determine whether the Council holds any additional information falling within the scope of the complainant's request apart from that already readily accessible to him on its website.

## **Reasons for decision**

## Section 1(1) of the FOIA – Information held / not held

- 8. Under Section 1(1) of the FOIA anyone who requests information from a public authority is entitled under subsection (a) to be told if the authority holds the information and, under subsection (b) to have the information communicated to them if it is held and is not exempt information.
- 9. Where there is a dispute between a public authority and a complainant as to whether any recorded information falling within the scope of a request is held, the Commissioner, following the lead of a number of First-tier Tribunal decisions, must decide the matter based on the civil standard of a balance of probabilities.

- 10. On 1 July 2021 the Commissioner wrote to the Council noting that of the information it held, some had already been disclosed and the rest was reasonably accessible to the complainant on its website. The Commissioner also said he would contact the complainant to clarify which aspects of its response were outstanding and why.
- 11. On 1 July 2021 the Commissioner also contacted the complainant to ask which of the Council's responses to the eight questions in his request he was dissatisfied with and why.
- 12. The complainant responded on 2 July in general terms stating many of his requests asked for the same information because of delays and changes of tact by the Council resulting in obfuscation and a lack of clarity. It therefore remained unclear to the Commissioner which aspects of the Council's response the complainant disagreed with.
- 13. On the 9 July 2021 the complainant contacted the Commissioner and requested an 'update' on all of his complaints including the one which is the subject of this Decision Notice.
- 14. The Commissioner responded on 12 July 2021 with a detailed schedule of all of his complaints. In relation to the one which is the subject of this Decision Notice, the Commissioner pointed out that the Council had either disclosed or made available on its website all the information it held falling within the scope of his request. Therefore, his comments were awaited as to which aspect of the response were unsatisfactory and why.
- 15. In the absence of a response from the complainant, the Commissioner contacted him again on 9 August 2021 for his comments. To date no response has been forthcoming.
- As part of his investigation, the Commissioner contacted the Council on 18 February 2022 to request details of the enquiries and searches it carried out to identify, locate and extract all recorded information falling within the scope of the request.
- 17. The Council's Deputy Town Clerk responded on 9 March 2022 and explained the steps she had taken to search for relevant information in order to respond to the request in June 2020. These included speaking with the Responsible Financial Officer, who as the Council's accountant, held all of the relevant financial information. She confirmed that he had seen the request and considered all of the queries raised by the complainant. He gave directions as to where all the information relating to the accounts was published on the Council's website. He also searched through folders relating to the request and confirmed no

further recorded information was available. The Council then responded to the complainant on 25 June 2020 with details of the information held and provide website links to it.

- 18. The complainant has not supplied the Commissioner with any arguments as to why he considers that further information should be held. The Commissioner has also had regard to the nature of the questions posed which do not seek specified documents but which could be construed as general enquiries relating to the topic of the disposal of the site. On balance, the Commissioner is satisfied that the Council carried out reasonable enquiries and searches at the time of the request to locate information within the scope of the request.
- 19. the Commissioner is therefore satisfied, based on a balance of probabilities, that the Council does not hold any further information falling within the scope of the complainant's request apart from that already made available.
